

Comparative Analysis Report of LLMs for Vedic Astrology Prediction

Objective

To evaluate various large language models (LLMs) on their ability to generate accurate astrology.

Name: Kartik

DOB: 17 June 2003

Time: 6:00 AM

Place: Haryana, India

Evaluation Criteria

Models are assessed across six dimensions:

1. Accuracy of chart interpretation (Lagna, Rashi, planetary placements)
2. Use of Dasha and transit systems
3. Predictive depth (marriage, career, children, etc.)
4. Remedies and actionable suggestions
5. Clarity and structure
6. Uniqueness and personalization

1. ChatGPT Plus (Rating: 5/5)

- Full chart with planetary positions, Lagna (Virgo), and Moon sign (Libra)
- Strong grasp of Dasha system: Jupiter-Venus and Jupiter-Rahu correctly highlighted
- Marriage prediction (2026-2029), career, and spiritual insights supported by planetary logic
- Remedies, compatibility checks, and follow-up tools offered
- Highly structured, in-depth, and actionable

Verdict: Most complete and accurate. Ideal for technical and serious users.

2. DeepSeek (Rating: 4/5)

- Dasha-based timelines well-analyzed (Mercury, Jupiter periods)
- Job windows (late 2024, 2025) and marriage timing (2033-2035) specified
- Pre-marriage relationships described with Rahu cycles
- Spouse characteristics and dosha evaluations included
- Slightly limited on exact chart layout and planetary placements

Verdict: Reliable for timeline forecasting. Balanced and intuitive explanations.

Comparative Analysis Report of LLMs for Vedic Astrology Prediction

3. Qwen (Rating: 4/5)

- Offers deep personality-based insights (love vs arranged logic, career phases)
- Lists spouse traits, probable profession, and how/when you'll meet
- Mentions wealth generation potential and Rahu effects in romance
- Slight sign inconsistencies (e.g., Moon in Virgo instead of Pisces)

Verdict: Excellent for psychological insights and personalized life guidance.

4. Grok (Rating: 2/5)

- Offers generic house interpretations without specific timing
- Lacks detailed Dasha analysis or year-wise predictions
- Doshas/Yogas only mentioned in passing

Verdict: Too basic and general. Useful only for introductory summaries.

5. Perplexity (Rating: 2/5)

- Clear formatting and simple explanations
- Minimal use of Dashas or predictive logic
- Very limited remedy and house-wise breakdown

Verdict: Structured but lacks technical astrology depth.

6. ChatGPT Free (Rating: 2/5)

- Understands key chart components but lacks detail
- Refers users to external calculators instead of computing internally

Verdict: Better suited for quick overviews or non-technical users.

7. Meta LLaMA (Rating: 1/5)

- Uses Western astrology only (Sun sign-based)
- Ignores houses, Dasha, or Vedic structure

Verdict: Not suitable for Vedic astrology applications.
